

SURVEY OF INTEREST IN ECE FROM THE BEST UNIVERSITIES IN THE WORLD

This survey compiled from the Book of Scientometrics shows that the ECE theory has been read regularly in the top ranking universities in the world since 30th April 2004 when the Book of Scientometrics was started. The top ranking universities are defined using the top twenty in Webometrics and the top twenty in the Times Higher Education World Reputation rankings. In order of ranking they are as follows. The asterisk denotes repeat, often numerous, downloads. "Wisconsin" denotes Wisconsin Madison, and "Minnesota" denotes Minnesota Twin Cities. There are twenty nine universities in the two lists in all. The numbers for each month give the total number of these top 29 universities from which visits were received in a given month.
