Footnotes

About 180 pages of statistics are available on www.aias.us showing details of visits from essentially the entire physics sector worldwide: all leading universities, institutes, leading governmental research laboratories, all major corporations, and also from Head of State staffs, Parliamentary Staffs, Ministerial staffs, Science Research Councils and Funding Agencies and other Governmental staffs worldwide. A total of about five million hits have been recorded for AIAS websites during this time, from up to 116 countries. www.aias.us and www.atomicprecision.com are together attracting about two million hits a year currently (time of writing Aug 06). ECE theory was started in about March 03, and the above table shows a clear and dramatic increase in interest from Oct 03 to Oct 06, showing that ECE is mainstream physics. The stats were distorted by link spammers invading the www.aias.us site in late 2006. These were removed by locking up our feedback activity sites. A few weeks ago the very popular book preprint by Lar Felker was removed prior to publication.

Myron W. Evans, British Civil List scientist,
 Director, Alpha Foundation's Institute for Advanced Study (AIAS, www.aias.us.)
